

VoIP Plug-in for Microsoft Fax

FREE Plug-in that Connects "Windows Fax and Scan" to VoIP

This free plug-in allows people to use "Windows Fax and Scan", the Microsoft fax software already included in Windows 7, Vista* and XP to connect and transmit faxes via VoIP providers, IP-PBXs and VoIP gateways using the standard VoIP based SIP T.38 fax protocol. This VoIP fax plug-in is easy to install and coupled with Microsoft Fax offers a simple VoIP based desktop fax solution with easy print-to-fax capabilities.

The VoIP fax plug-in is ideal for the basic faxing needs of any size business from SoHo, to Small Business, even to Enterprise. For Service Providers, offering the plug-in to their customers means all the document-to-fax conversation takes place at the customer realm. No maintenance or support is required by the provider because "Windows Fax and Scan" is integrated into Microsoft Windows.

VoIP Plug-in for Microsoft Fax

Connects "Windows Fax and Scan" to VoIP solutions that support SIP T.38

SIP T.38

- VoIP Provider
- IP-PBX
- VoIP Gateway
