

VoIP Plug-in for Microsoft Fax

Extends VoIP Fax Capabilities to Microsoft Fax

Microsoft Fax is one of the easiest fax clients to use and most convenient to access because it is included in business versions of Microsoft Windows. With the VoIP Plug-in for Microsoft Fax, connecting fax to your VoIP infrastructure is easy; it will allow all users in your business to connect to your VoIP system and fax from their desktop.

Ideal for small-medium business and organizations wanting a reliable VoIP fax solution; the VoIP Plug-in for Microsoft Fax enables Microsoft Fax to utilize SIP T.38 VoIP fax protocols allowing it to connect to the PSTN via a local VoIP gateway rather than legacy modem hardware. This easy-to-install, plug-in driver solution offers a wide array of deployment options including in conjunction with: Microsoft Small Business Server, Response Point and VoIP and media gateways.

VoIP Plug-in for Microsoft Fax

Instead of requiring the use of a legacy fax modem; the VoIP Plug-in for Microsoft Fax enables Microsoft Fax to utilize FaxBack's NET SatisFAXtion SIP T.38 VoIP fax driver – the same fax driver used throughout FaxBack's VoIP fax server product line.

VoIP Plug-in for Microsoft Fax (Free Edition) Installs on individual workstations. Routing inbound faxes to specific users with DID routing is straightforward with the Free Edition of the VoIP Plug-in for Microsoft Fax. By simply adding routing rules on your local VoIP media gateway, users will be able to automatically route inbound faxes directly to the intended recipients desktop.

VoIP Plug-in for Microsoft Fax (Small Business Server Edition) Users can also connect Microsoft Fax to their Microsoft Small Business Server (SBS) to further enhance their Microsoft Fax solution. With the SBS version of the VoIP Fax Plug-in for Microsoft Fax, the Plug-in is installed on the SBS server instead of individual workstations.

NET SatisFAXtion VoIP Fax Servers. For the power of a fax server with increased flexibility in fax document management and workflow integration. All FaxBack VoIP fax solutions are built on the NET SatisFAXtion T.38 VoIP fax driver which enables flexible and reliable fax deployment options.

- **Small Business** (2-4 ports) Complete Reliable, Easy-to-use.
